Basis or Rationale for Decision:

This fire originated directly adjacent to and burned State of Montana and private lands and private structures, including the rural area north and east of Frenchtown, MT. For this reason, the Frenchtown and Montana DNRC IA Incident Commanders made decisions to utilize all available air and ground resources to keep the fire from moving rapidly to the north and east. Even though extreme fire behavior and spread were evidenced, and some structure loss occurred, a much more traumatic event was avoided. Air resources consisted of heavy air-tankers and helicopters with buckets. Extensive ground resources of all wildland fire agencies and cooperators were employed. A full force effort, utilizing a national Type I team was employed to minimize burned acreage and loss of values at risk. During the course of the fire, both CSKT and DNRC sponsored resources worked the entire perimeter of the fire. As needed, State, contract, and RFD resources worked back and forth across jurisdictional boundaries to effectively and efficiently contain the fire. As of the closing date of this cost share, each wildland fire agency focused work within their protective areas. Based on where the fire started and this description of activities occurring during the incidents, the following cost share was determined:

1. A County assist was granted to Missoula County for private lands under their protection in accordance with the Montana DNRC State-County Fire Protection Program. Montana DNRC is responsible for those designated costs at the time of the agreement to assist.
2. No costs will be shared by either Montana DNRC or the CSKT for work performed by the Rural Fire Departments working for Frenchtown Rural Fire District under the Montana Mutual Aid Assistance called for by Frenchtown Rural Fire District.
3. No costs will be shared by the Lolo National Forest. National forest system lands were involved in the incident, however, all Lolo National Forest lands within the Black Cat fire were under Montana DNRC protection.

4. All costs will be shared at the rate of 86% to the Montana DNRC and 14% to the Confederated Salish Kootenai Tribe, BIA Flathead Agency.

Other Conditions:

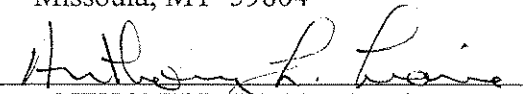

1. Agency specific costs will not be shared.
2. Costs incurred by cooperators not engaged in the unified fire suppression activities will not be included as a part of this cost share agreement.
3. Responsibility for tort claim costs or compensation for injury costs will not be a part of this agreement. Responsibility for these costs will be determined outside this agreement.
4. All costs originating from orders placed by and for the incident that can be reasonably obtained and estimated for the cost share period will be included in this agreement.
5. Costs for accountable, sensitive, and durable property purchased by each agency will be charged directly to that agency and will not be shared.
6. Non-suppression rehabilitation costs are the responsibility of the protection agency and will not be shared.
7. Sharing of final actual costs between the agencies will be based on a combination of suppression effort, burned area (acreage) and by agreement of fire officials of CSKT and DNRC.
8. Per the **05-FI-11015600-014** Cooperative Fire Agreement billing procedures, the parties to this agreement will determine the total costs of each agency. Each agency will bill for their costs.

This Agreement and the apportionment described are our best judgments of fair and equitable Agency cost responsibilities.
